

Classic TOD:NYC

Posted by [Glenn](#) on December 30, 2006 - 12:49pm in [The Oil Drum: Local](#)

Topic: [Miscellaneous](#)

Tags: [new york city](#), [oil](#), [peak oil](#) [[list all tags](#)]

I'll be taking at least a week off of writing for TOD over the Holidays. It's been an interesting year. NYC is in a very different place in many ways. We have a [Mayor](#) who has announced he is [committed to sustainability](#), including a pledge of a 30% reduction in carbon emissions. We will have a [newly elected "Peak Oil aware" Governor](#) in Eliot Spitzer. The [New York Streets Renaissance Campaign](#) has won a string of minor victories from the Department of Transportation and it's poised to make huge impact next year. And we may finally see some movement on [congestion pricing](#).

And on a personal note, this year has seen the birth of the first TOD spin-off neighborhood organization: [Upper Green Side](#). We should have our 501c3 early next year, so stay tuned on where you can send your donations!

So looking back, I thought I would point readers to some classic TOD:NYC posts that you might have missed. Enjoy the holidays and see you next year.
